EDUCATION

Bachelor of Technology *Sri Manakula Vinayagar Engineering College* *PDY , IND* **Class of 2027**
- Artificial Intelligence and Data Science - **CGPA 8.44/10**

Higher Secondary *Amalorpavam Higher Secondary School* *PDY, IND* **Class of 2023**
- +2 - **84.5%**

SSLC *Amalorpavam Higher Secondary School* *PDY, IND* **Class of 2021**
- 10th - **ALL PASS**

EXPERIENCE

Voxloom.in
Jr. Software Engineer Intern *PDY,IND* DEC 2025 -Present
- Contributed to the development of AI-powered voice and real-time communication systems that automates businesses.
- Built and integrated WebRTC and WebSocket-based call pipelines using Python, enabling real-time audio streaming and event handling.
- Worked extensively with Agno,Pipecat, Twilio, and speech/LLM pipelines for intelligent call handling and human handoff mechanisms.

Freelancer - Experiences

AI ManagerOn
AI Engineer and Web Developer *NYC,USA* JUL 2026- Present
AI-Powered Architectural Drawing & Tender Analysis Platform
- Developed an AI-powered SaaS platform using LLMs, Machine Learning, OCR, Computer Vision, and PDF processing to extract construction components, quantities, dimensions, and specifications from architectural drawings.
- Automated tender management and bid-leveling by analyzing multiple contractor tenders, standardizing pricing and scope data, and identifying cost variations, missing items, and scope discrepancies.
- Implemented ML-driven optimization and tender analysis to evaluate bids against project requirements, cost, scope, and predefined criteria, generating data-driven insights for optimized tender selection and procurement decisions.

Primeverse Trading
Full stack Developer *TS,TN,IND* APR 2026 -JUL 2026
- Built full stack LMS portal with HLS media streaming and agentic automation pipelines and workflows.
- Worked extensively with deployment parts and realtime streaming.

WhisprNet.ai
Machine Learning and Agentic AI Developer *HYD, IND* FEB - AUG 2025
- Built retrieval-augmented generation (RAG) pipelines with LangChain and local/cloud LLMs to enable context-aware, conversational automation.
- Collaborated with stakeholders across HR, IT, and Finance to translate business requirements into production-ready AI automation agents, delivering measurable productivity gains.

Fitnosh.Life
AI Engineer and Automation Developer *CBE, TN, IND* JUL 2025 - SEP 2025
- Designed and deployed AI-driven Instagram and SEO automation pipelines using n8n, reducing manual digital marketing effort by 90%.
- Built an NLP-powered content agent with LangChain, local LLMs, and cloud-hosted transformer models to generate optimized captions, blog content,Data Analysis of the CRM in the kitchen used for automation for outlier generation for predictive modelling.

SKILLS

Languages : Python |JavaScript | Java |TypeScript
Database : Cloud Providers | VectorDB | MongoDB | PostgreSQL |SurrealDB
Frameworks & Orchestrations : Flask |FastAPI |Litestar |Langchain| Agno |Pipecat | Tableau | PowerBI
Data Structures and Algorithms : Statistics and Probability |Neural Networks Optimization
CRM & Product Management: CRM Systems | Product Management
CORE: Machine Learning | Deep Learning | LLMs | Agent Orchestrations and Automation | Data Analysis , Processing and Manipulation

NOTABLE PROJECTS

Alternea.ai *- Cognizant* ***- Nurture Partner Network*** AUG 2026
Role : Team Lead | AI Agents Orchestrator and DevOps Engineer
Github : https://github.com/aashiqmustak/cts-npn
TechStack : Agno | Python - LiteStar |Docker | AWS -EC2 | Flutter |Scikit-Learn |Pinecone |PostgreSQL
- *AI-Powered Drug Coverage & Adherence Platform: Built an agentic AI platform to automate drug coverage, prior authorization, clinical safety, alternative discovery, and medication adherence workflows to give optimized drug to patients .*
- *Orchestrated agents using StateGraph with guardrails, MlOps and HIPAA validation; developed backend APIs using Litestar, hosted ML models, and deployed the complete frontend and backend on AWS EC2.*

NCERTGPT* – Intelligent Educational Chatbot ©** ***Zarnex.ai *(Patent owned - Liscenced)* *PDY, IND* Owner@Contributor
TechStack : RAG |ChromaDB|Python|Agno
Role : Full Stack AI Engineer

- Built an AI-powered educational assistant trained on NCERT textbooks, enabling students to query concepts conversationally with syllabus alignment.
- Implemented Retrieval-Augmented Generation (RAG) pipelines using LangChain and vector databases (FAISS/Chroma) to fetch not only the relevant answer, but also the exact page number, line reference, and section from the source textbook.
- Integrated local LLMs and cloud-hosted models (Vertex AI) for hybrid inference, ensuring both scalability and cost efficiency.
- Deployed as a cloud-hosted API service accessible via web/mobile, delivering real-time, reference-backed responses.
- Improved learning reliability by grounding AI outputs in verifiable NCERT textbook references, enhancing trust and adoption among students.
- ***Secured patent ownership (Zarnex.ai) with licensed deployment rights; copyright registered for source code and trained dataset.***

ZARNEX-VOICE PRESENT
TechStack : Python, Pipecat, WebRTC, WebSockets, OpenRouter, Silero VAD, LLMs, Docker,SurrealDB(SQL)
Role : Voice Agent - AI Orchestrator
Website : *www.voice.zarnexai.in*

- Engineered a real-time conversational AI voice platform for international calling, enabling low-latency, human-like voice interactions by integrating STT, LLM reasoning, and TTS into an end-to-end streaming pipeline.
- Built scalable voice-agent workflows using WebRTC/WebSockets for real-time audio streaming, turn detection, dynamic conversations, and API/tool integrations, enabling automated international customer calls, lead qualification, and business workflows.

***DOC-NOVA* | 1ST Place winner of Hack Masters Hackathon** JAN 2024
TechStack : Scikit Learn | Python | ReactJS
Role : ML Engineer

- Developed a healthcare AI platform providing predictive analytics and early risk detection using ML/DL-based health prediction models.
- Implemented OCR pipelines for digitizing prescriptions, lab reports, and handwritten medical records, enabling structured data extraction for downstream analytics,ensuring HIPAA-compliant, scalable, and secure access.
- Built NLP-driven assistants to process clinical text and provide contextual insights, risk scores, and recommendations for doctors and patients.
- Designed end-to-end product architecture: data ingestion, preprocessing, health prediction models, and secure API deployment.

SMART INSURANCE DECISION AGENT - Winner of AI Ignite - National level GENAI Hackathon NOV 2025
TechStack : Pipecat|Langchain |Flutter | ReactJS
Role : Agentic AI Developer

- Handled inbound and outbound calls to assist customers with insurance inquiries, policy selection, and claims support
- Provided customer support by resolving queries related to premiums, renewals, and coverage while ensuring high customer satisfaction
- Coordinated with insurance providers to process policies, follow up on leads, and drive sales through effective communication

RESEARCH AND PUBLICATIONS

SalesForge — Conversational Sales Analytics & Demand Forecasting System *Published Research* ***IJRASET*** APR 2026

Tech Stack: Python, AWS Lambda, API Gateway, S3, AWS Glue, Athena, EventBridge, CloudFormation, Prophet, Streamlit, Plotly, Pandas, Parquet, boto3.

- Built a cloud-native conversational BI platform integrating Llama 3.1 70B via Groq with real-time sales analytics, enabling natural-language querying of business and sales data.
- Developed a serverless AWS data pipeline using Lambda, API Gateway, S3, Glue, Athena, EventBridge and CloudFormation, alongside Prophet-based 30/60/90-day demand forecasting.

CERTIFICATIONS

Large Language Models LLMs	*National Programme on Technology Enhanced Learning*	*IIT,DELHI*	NOV 2025
Python for Data Science	*National Programme on Technology Enhanced Learning*	*IIT, MADRAS*	SEPT 2025
Cloud Foundations	*Amazon Web Services (AWS)*		DEC 2025
Machine Learning	*Amazon Web Services(AWS)*		DEC 2025
